Water
as soft
as you

Automatic Water descaling System to
Enhance water quality for entire house needs

100% Maintenance Free No Salt & Chemical No Magnets

ENHANCE WATER QUALITY FOR ENTIRE HOUSE NEEDS

Improve performance

- ▶ Geysers
- ▶ Washing Machine
- ▶ Shower & Taps
- ▶ Car washing
- ▶ Window Cleaning
- ▶ Toilet Sink
- ▶ Dish Washing
- ▶ Swimming pool

100% Maintenance free

No Salt & Chemicals

No Magnets

SUPER DESCALER is an electronic water descaling treatment device that solves hard water problems without using membrane, chemicals, magnets and also without wastage of water & salt. The Super Descaler works on Electronic-Impulse based technology. It changes crystalline structure of the water-soluble calcium carbonate and magnesium, this change in physical structure of water reduces adhesive strength of scale and removes it from pipelines.

- Super Descaler follows maintenance-free concept.
- It is very easy to install and no tools or plumbing work is needed.
- Maximum electricity consumption by Super Descaler is Rs 80 per year and Rs 200 per year in special cases.
- Super Descaler is an eco-friendly solution which protects the skin, hair, piping system and appliances of water againsts scale deposits and removes existing deposited scale also.
- Super Descaler is suitable for all types of pipelines materials.
- Model is to be decided on the basis of flow rate (Litre per hour) from the pipe lines.

SUPER DESCALER

IMPACT OF HARD WATER ON

HAIR

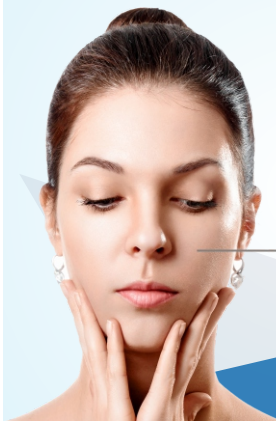

The chemicals and minerals that exist in hard water affect the health condition of your skin and hair. Hard water has a direct impact on how well your shampoo and conditioner are able to clean your hair. Excess dissolved minerals in water creates a thin film on your hair that makes hair inferior, dull, dry, rough, causes change in color and hampers your hair growth.

Shampoo

Hard water reduces lather while cleaning your hair with shampoo and conditioner. This encourages you to use more shampoo to get sufficient amount of lather and can cause excessive build up. Hard water prevents shampoo to dissolve in water and make your hair feel heavier and weighted. Such action leaves shampoo in your hair which blocks hydration and clogs the pores and makes it difficult for conditioner to give the desirable effect.

IMPACT OF HARD WATER ON SKIN

Water has a clearly visible effect on your skin. Water impacts the quality, smoothness and glow of skin. Hard water prevents soap and washing gels from leaving the skin surface and this creates a layer of unnecessary minerals over the skin and makes skin dry and itchy.

Dry and Itchy

Excess sodium present in water makes your skin tight and itchy and using hard water leaves rashes on skin because of unnecessary minerals that remain upon skin.

Increased Acne

Excess negative minerals of water and uncleaned surface of skin makes it dry and itchy and prevents skin from maintaining required minerals and oils in it, this enhances acne on skin.

Super Descaler pulverizes the excessive negative minerals of water and helps to reduce the friction of water on skin and improves the quality of your hair and skin with smooth conditioned water.

Super Descaler on Aqua Equipments

Metals are the most common and mandatory material in equipments that has an application that mandates water usage like washing machine, dishwasher, geysers, water sprinkler, car washing pumps etc. Hard water scaling is very common among all these equipments and using Super Descaler will reduce the heavy maintenance cost of all these equipments and prolongs their life .

Super Descaler on Pipes, Showers and Floors

High minerals like calcium carbonate (CaCO_3), magnesium hydroxide ($\text{Mg}(\text{OH})_2$), and calcium sulfate (CaSO_4) creates a layer of scale in piping system, around peripheral of faucets, showers, floors and tiles these scale slowly degrades the material and boosts rusting in such areas.

SUPER DESCALER

It pulverizes the scale particles and diminishes the adhesive power of scale and helps to flush out from pipes easily and provides effortless cleaning of floors, tiles and other surfaces.

Suitable for
Bungalows
Personal Apartment
Multistory Apartment
Commercial Apartment
Cooling Towers and
Other Industrial Applications.
