## To Power the Fan

Solar LED Lantern

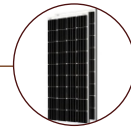

Hyper Sell Chamber

Adaptor 230VAC

Free with stove

Solar Panel

- ▶ In physical world two basic energy is heat and sound, while performing yagna heat energy from fire and sound energy from mantras blends together to provide spiritual, desired physical and psychological benefits.
- ▶ Various type of samvidha (Materials used in Havan) in the yagna-fire sublimates, fumigate and vaporized to produce ions with positive energy that improves the surrounding atmosphere through mantras & sonic waves.
- ▶ In this modern Kund all these above religious aspects are taken care, this kund generates lowest % of carbon-monoxide and consumes less quantity of yagna material. Samvidha is vaporized and gasified 100% without waste because the temperature attained by the kunda is always above 300°C along with the purified flames upto 1300°C, the Kund is designed from copper pot to get the uniform temperature along with the impact of copper oxygenation which plays vital role in purification of atmosphere.
- ▶ The shape of kund boosts up the combustion process. combustion process in our havan kund will not affect the interior of indoor AC, non-AC halls and rooms for marriage ceremonies as it do not produces thick and dence smoke with unwanted fragrance.
- ▶ The daily use of Havankund with proper ingredients will keep all negativity away from your surroundings along with flies, mosquitoes and such other unwanted insects, it also helps to emits environment friendly gases and radiation to enhance nature cycle.
