PEMF

3rd Eye Multi Therapy

PEMFs

PEMFs helps to support healing of damaged and inflamed tissues, muscles and reduces pain, swelling. Inflammations increases circulation and circular levels of oxygen, aids in supporting general muscular and nervous system health and function stimulates the body's natural healing process.

Pulse magnetic field therapy re-energizes damaged cells by performing electrical change within the cells that restore it to its normal healthy state. Cellular metabolism is boosted, blood cells are regenerated, circulation is improved and oxygen carrying capacity is increased. Ultimately immune system gets better and healthier, nervous system relaxes, bones and joint becomes stronger and vital organs like kidney, liver and colon are able to rid themselves of impurities and detoxifying the body. Pulse magnetic field therapy can reduce pain and better the quality of your life by allowing your body to perform and function as it is prepared to do.

PEMF addresses the impaired chemistry and thus the function of cells which in-turn, improves health. PEMF delivers beneficial, health enhancing EMFs and frequencies to the cell. Low frequencies PEMFs of even the weakest strength pass right through the body, penetrating every cell, tissue, organ and even bones without being absorbed or altered. As they pass through they stimulates most of the electrical and chemical processes in the tissues. Therapeutic PEMFs are specially designed to support cellular energy positively, resulting in better health condition.
