No plumbing or  
expertise required

No  
Magnets

Instant  
visible results\*

No wastage  
of water

No operating  
cost

Easy to use

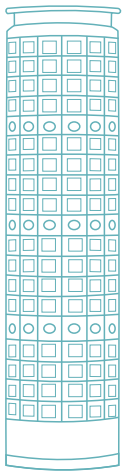

**Jal**GUARD

# JalGUARD

## PRODUCT DETAILS

Jal guard is a unique product that gives relief from hard water and its problem with additional anti bacterial Cu Reinforcement design. Hard water scale is made up of Calcium ( $\text{Ca}^{+2}$ ), Magnesium ( $\text{Mg}^{+2}$ ) and other substances. This hard water scale impacts our house cleaning, aqua electrical equipments like geysers washing machines, car cleaning pump, water pressure pumps, cooling towers, heat exchanger etc in Industries. Jal Guard chemically breaks and alters the structure of calcium and magnesium with sequestration process in water that makes scaling ions inactive. Anti bacterial booster reduces bacterial levels in tank water to provide healthy water for usage.

Anti Bacterial  
Cu Reinforced Design

## 1 STEP EASY TO USE

Tie the string of the device at top of the water tank in a manner that the device remains horizontally submerged all time & feel your result after one .

## TEST YOUR DEVICE

Take two sample of equal volume of water one direct bore well or untreated water and another from treated water through device. Boil both the samples for 10-15 minutes let them cool to normal temperature. Untreated water will have visible hard water scaling on vessel surface and in water too and treated water will observed cleaner and found of less scale relatively to untreated water.

Untreated water

Treated water

( Above photos are shown for explanation purpose. Treated water is for home use & having no drinking application.)

# FEATURES

## ADVANTAGES

### For Home & Buildings

- Maintains hygiene by preventing scaling and corrosion in pipelines.
- Prolongs life, reduces maintenance and electric consumption of Aqua electrical devices like Geysers, Washing Machine, Dish washer, Pressure pumps etc.
- Prolongs life of showers, faucets and pipelines.
- Removes previously gathered scale in pipelines and water tanks.
- Improves quality of washing for cloths
- Reduces the need and consumption of washing power.
- 

Reduces  
Hair & Skin  
Problem  
Due to  
hard water

**For Personal use**

Improves quality of water for hair wash & prevents chances of dry and itchy skin.  
Prolongs the life and reduces maintenance cost of aqua electrical equipments.  
Improves quality of gardening and plants.

**THINGS TO UNDERSTAND.**

- For better testing experience clean your tank before using
- Jal guard does not change TDS and hardness level of water
- No minerals are removed in treatment process
- Device is made from Hygiene material & having Antibacterial CU reinforced design.
- Device is capable to provide result up to 1550 TDS.
- For higher TDS range connect our support team for better solution.
- 

**TERMS & CONDITIONS**

- Life of device is guaranteed for 10 months after fitting.
- Life of device varies are per size of water tank & its usages.
- Quality of result differs from user to users as water quality parameters differs from place to place.
